

Our Early Childhood programs are flexible and affordable!

At St. Joseph Parish School we offer flexible K3 & K4 program schedules to fit with your personal needs, as well as on-site extended care. Our K3, K4 & K5 early childhood programs focus not only on intellectual growth, but emotional and spiritual growth through play and active engagement. We offer an affordable, Catholic, early childhood education where your child will be nurtured to excel at their God-given talents.

Strong Moral Values and Daily Exposure to the Catholic Faith

St. Joseph Parish School offers education as an extension of what students are being taught at home. We provide influences that mirror your family's Catholic beliefs. We offer a school where it is okay to talk about God. In fact, children are soaked in an environment where the power of God is everywhere they look.

A Community for your Family

St. Joseph Parish School is a network of support. Students and families develop a sense of community while attending our school. A SJPS education provides an opportunity for fellowship, friendship, and service within our Catholic beliefs to create a warm, welcoming school community.

Devoted Teachers and Staff

Our staff is devoted to our school and its students. Our teachers have a calling to educate and share the joy of God with their students. Smaller class sizes allow them to fully engage with each child and provide the educational and spiritual guidance that students require.

High Quality Education, on Many Levels

We offer an affordable private school education. Catholic schools consistently outperform public and other private schools and have higher High School graduation and College attendance rates. Not only do students excel in core courses, but we also educate the whole child in mind, body, and spirit. We teach compassion, care and concern, and service as part of the curriculum. Virtues of respect, discipline, and diligence are necessary to complete our curriculum. In addition, we offer music, foreign language, physical education, art, and technology to further develop a well-rounded student.
